SUMMARY

Mathematics student skilled in Python, SQL, and interpersonal communication. Focused on leveraging exceptional problem solving ability with statistical methodologies and programming to deliver data-driven insights.

EDUCATION

California Polytechnic State University - San Luis Obispo

Bachelors of Science in Mathematics

- GPA : 3.86
- Expected Graduation Date : June 2027
- Relevant Coursework : Multivariable Calculus, Linear Algebra, Statistics, Data Structures, Differential Equations, Physics
- Organizations : Cal Poly Data Science Club, Cal Poly Quantitative Finance Club

PROJECTS

FantasyLine

- Built Python pipeline to scrape, clean, and structure 500+ weekly NFL sportsbook player props
- Constructed probabilistic model converting sportsbook odds into fantasy point projections for 200+ NFL players, deployed via Streamlit app to support users in setting weekly fantasy lineups and evaluating betting lines

NFL Touchdown Regression Visualization

- Created linear regression model using volume and yardage features to forecast 2025 touchdown regression candidates
- Generated interactive Tableau dashboard that provides users draft insights by visualizing correlations between touchdown rates and overperformance/underperformance for RBs, WRs, TEs

Swarm Intelligence Trading Agent

- Engineered algorithmic trading ensemble that leverages swarm intelligence to optimize investment strategy based on recent performance and market conditions
- Backtested and evaluated performance across 11 assets and achieved positive annual returns for 82% of tested tickers over 6 month period

EXPERIENCE

Quantitative Analyst (Research and Development) - *Cal Poly Baseball* (Internship, 2025-Present)

- Utilized Python, SQL, and a comprehensive database containing 3+ years of NCAA Division I pitching data to increase player batting averages and OPS percentages
- Collaborated on the development of a predictive modeling system that calculates probability of upcoming pitch types and identifies pitch sequencing patterns
- Communicated performance and scouting insights to the coaching staff to bolster trajectory of team improvement

Analyst & Coach - *San Diego Elevate Baseball Club* (Part-time, 2023-2024)

- Managed training and development for 6 club teams ensuring practice plans optimized player development
- Performed statistical analysis on 100+ athletes performance data (i.e. batting splits vs. LHP and RHP) to create data-driven lineups
- Applied mathematical framework to hitting mechanics, emphasizing launch angle correlation with base hit probabilities

Team Manager - *San Luis Coastal Unified School District* (Part-time, *2024-Present)*

- Trained four teams of 5th and 6th grade students in basketball and soccer while maintaining all-time win rate above 70%
- Coordinated tournament scheduling, referee assignment, and field selection within the school district

Courtesy Clerk - *Ralphs* (Part-time, 2022-2025)

- Managed inventory workflows in a fast-paced retail environment, ensuring accurate truck delivery processing
- Fostered meaningful interactions to promote customer retention

TECHNICAL SKILLS

- **Languages & Tools**: Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), SQL, Tableau, GitHub, Jupyter Notebook, Google Colab
